- ▶ Touch Screen Kiosk (Informative & Interactive)
- ▶ V-TRACK - Traffic Census System (Vehicle Counting & Identification Analysis Report)
- ▶ Data Encryption
- ▶ Variable Data Printing (Large Quantity with High Quality)
- ▶ Call Centre Services (Inbound and allied services)

Election Management Project was conceptualized to conduct Urban Local Body & Panchayat Raj Institutions elections in most Transparent, Fair and efficient manner. A common voter is always at the focal point of this initiative. It aimed at making concise, unbiased information available to the citizens.

In previous elections, we all have witnessed campaigns appealing voters to execute their fundamental right. It asked general public to come forward and form a better government. The campaigns did good job however, voters were still confused about where to find their name in voter list, where is the polling station, who are the contesting candidates in their ULB or PRI. However, now SEC can take a step forward and make the right information available to people.

Implementation of Election Management Project (E.M.P.), so as to use state of art information technology for providing timely, accurate and up to date information to voters, political parties, contesting candidates, public, election machinery, media and all other concerned.

Media, political parties and voters will appreciate that; this initiative will definitely help in discharging SEC's constitutional responsibility and mandate of conducting elections in efficient, fair and free manner.

## State Election Commission of Maharashtra - EMP & E-Yadi

We Ultimate Information Technology Pvt. Ltd. is working for last 9 years in the field of election management, development of election information websites, voter list preparation software, voter name search engine, auto reply SMS for voter name & polling booth searching and printing of voter list.

In last few years local bodies & urban local bodies had changed their traditional way of making physical cut & paste of assembly voter list to form local ward wise voter list, the new trend was set to type on computer and get the list generated for election.

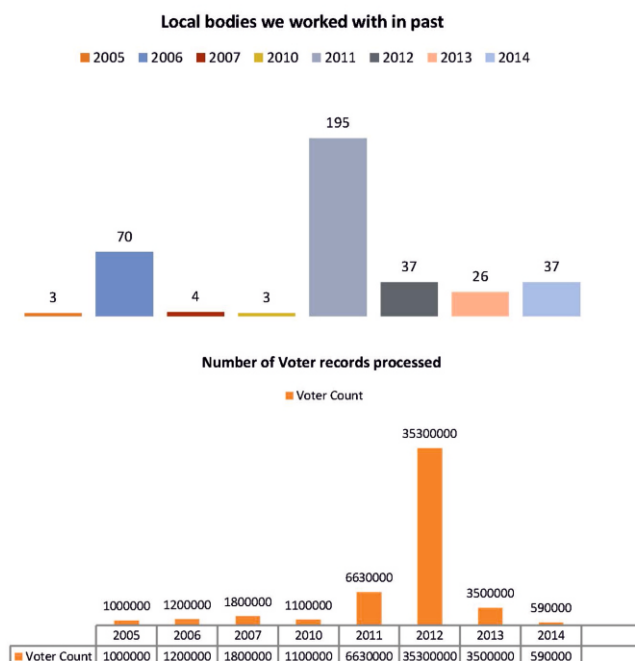

This new trend was also very much tedious and time consuming, involvement of man power for checking the accuracy of typed data was more.

In 2005 we have developed an application for Municipal Corporation election for voter list preparation, which does not need typing of voter name data, it was just uploading of the control chart (control table) of required ward and the software automatically bifurcates the voters in required wards.

Now the web application ई-यादी- (e-Yadi) (e-List) is enhanced up to certain level, that it can handle more than one election at a time.

## Our evolution and experience

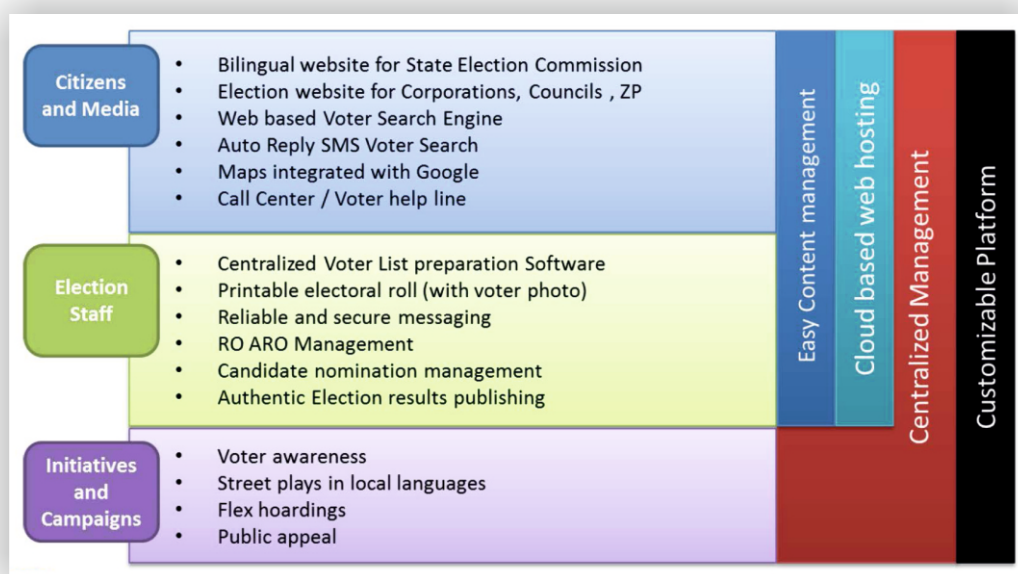

The adjacent graphs show how local bodies adapted our services and number of voter records processed.

The key challenges:

- Multiple geographical locations
- Numerous Stake Holders to handle
- Volume of voter records to process
- Up skilling the work force

## We have successfully served

- ▶ 195 Municipal Councils on a same day - 11th December 2011 - 7.2 Million voters
- ▶ 010 Municipal Corporations on a same day - 16th February 2012 - 21 Million voters
- ▶ 005 Municipal Corporations on a same day - 15th April 2012 - 2.6 Million voters

Successfully served the Election Management Project for more than 250 local bodies i.e. municipal corporations, municipal councils, nagar panchayats, zillaparishads, gram panchayats for their general & bye elections in last 3 years for state election commission Maharashtra.

## Pilot implementation of Election Management Project for State Election Commission Gujarat.

Gujarat State is one amongst the leaders when it comes to implementing new initiatives. Keeping up with this reputation and even taking it to next level, this time State Election Commission Gujarat is implementing Election Management Project (EMP) with the objective: “Conduct of fare, free and non-biased elections”

This program intends at voter awareness and education using internet. Voters can find their names in voter list, see ward formations, find their polling stations using Google maps and also see contesting candidates in their wards.

## Highlights of the website

- Use of regional language:**  
 Use of Gujarati language makes the website more appealing to users. This eliminates fear that internet is something meant only for high-educated. It adds a local touch and large masses can be helped.
- Election related news and latest updates:**  
 Election Administrators get complete control over “what, how and when” certain information should be published. Moreover this becomes authentic medium for people to receive information from. All important updates e.g. program dates, other news can be made available here.
- Election Contacts and Phone Numbers:**  
 The website maintains the contact book of important election officials and staff. To make them available as and when needed.
- Contesting candidates:**  
 Contesting candidates in each ward and under various reservation categories are listed. Candidate affidavits are scanned and uploaded for voters.
- Publishing the counting results real-time:**  
 Counting votes is yet another sensitive activity. News channels are usually the ones who broadcast count information upfront. However, sanity of this information cannot be checked every time. Websites content management engine allows to publish vote counting statistics at real-time.
- Interactive Maps of Wards with polling booth locations:**  
 Each ward’s geographical map is provided with boundary lines and polling booth locations. Popular platform of Google maps is leveraged for this.
- Voter Search Engine using internet and SMS:**  
 Voters having internet or mobile phone access can search their names in voter’s list from wherever they are. The search engine feature helps to find electoral wards, polling booths. The search engines are integrated with ward maps, contesting candidate information and vice versa.
- Downloadable Voters list:**  
 The voter list, as published, is made available on internet for download. If needed, anyone can download and print.
- External information link-ups:**  
 The website is built with an idea that it will serve people as long as it can. Some can use the information for further research. All important website e.g. Gujarat Government, Government of India, Gujarat State Election Commission websites are linked from here.

## Implementation of Election Management Project for State Election Commission Rajasthan for LB - ULB & PRI elections.

State Election Commission, Rajasthan  
राज्य निर्वाचन आयोग, राजस्थान

For Rajasthan State Election Commission we work for developing, providing and implementing the Web based solution for bifurcation & preparation of ward-wise draft and final Photo Electoral Rolls based on the Election Commission of India (ECI) Voter List Database as subsequently revised by the Electoral Registration Officers and the Election Management and Statistical reporting modules.

Preparation of web based ward-wise voter lists for each tier of Panchayati Raj Institutions i.e. 33 Zilla Parishads, 295 Panchayat Samities and 9900 Village Panchayats having 3.27 crore voters and 46 Urban Local Bodies having 63 lac voters was huge, complex and challenging to be completed and implemented in a tight time schedule.

### State Level Statistical Reports for ULB Elections for public & media -

UBL

- % Increase and Decrease in 46 Municipalities
- Polling booth report as voters
- Filling of Nomination/Rejection/Withdrawal and No of ward according to candidate
- Party wise and Sex wise contesting candidate & empowerment of women
- Polling Percentage and Voter turnout
- Percentage of polling booth according to polling percentage
- Polling percentage in reserve ward for women and sc
- Analysis of result of chairperson
- Analysis of result of Deputy chairperson
- Party wise Nagar Palika Result Winner Count
- Party wise Nagar Palika Voter Count

### Reports for ULB Elections (Administration Purpose) -

- Media Dashboard
- Law and Order Report
- Observer Reports

*"Election is a time-bound program. Information that should be published for voters is generated at most remote locations of the State and this information is continuously flowing. This information is important for administration as many important decisions are to be made based upon it. It is necessary that information reaches to its intended recipients in time."*

SEC, Rajasthan

### Analysis of PRI Election 2015 results -

PRI

- Result of Zilla Pramukh and Pradhan
- Result of Up zilla Pramukh and Up Pradhan
- Winning Candidate Pledge Pdf
- Candidate Wise Votes
- Winners & Runner-ups
- Result seats - Party Wise - (Sort by ZP & PS)
- Party Wise Vote Share - (Sort by ZP & PS)
- Result seats - Party Wise - (All Districts)
- Party Wise Vote Share - (All Districts)

### Composition of Constituencies

- % increase and decrease of voters in draft and final voters lists
- Polling booth report as per voters

### Analysis of received nominations -

PRI

- Day to day Nomination Statistics At Panchayat Samiti Level
- Day to day Nomination Statistics At Zilla Parishad Level
- Nomination Summary
- Received Nominations Details
- Party wise and gender wise contesting candidates and empowerment of women

### Poll Summary -

- Polling percentage
- Booth Wise poll percentage and voter turnout
- Polling percentage in wards reserved for Women and Scheduled Cast

### Result Updates Ticker

ULTIMATE INFORMATION TECHNOLOGY PVT. LTD.

## Implementation of Election Management Project for State Election Commission Rajasthan for LB - ULB & PRI elections.

State Election Commission, Rajasthan  
राज्य निर्वाचन आयोग, राजस्थान

State Election Commission Rajasthan is implementing an initiative to disclose mandatory information to voters by means of this portal. Election Commission intends to keep the voters informed about election programs, contesting candidates, up-to-date voters lists, helpful downloads, statistical information. The motive of this initiative is to create maximum possible transparency in election processes. It is also implicit that this process is made as much paperless as possible. Please visit "Commissioners' Desk" page for more information.

The CMS is designed for administrators to update the State Election Commission Rajasthan's web site. Internal structure of the administration section is designed to accumulate section for each local body such as Municipality, Municipal Corporation, Panchayat samiti or Entire district. User access is provided per local body. Each authenticated user is responsible to keep the website up-to-date with accurate data. Some of the information here will come pre-fed by State Election Commission. This information cannot be edited at district level.

The Content Management Section is designed for administrators to update the State Election Commission Rajasthan's web site.

Modernization / reconstruction of SEC Rajasthan's old website as per GOI web guidelines.

PS/SEC-Raj/2015/147

24<sup>th</sup> February, 2015

M/s. Ultimate Information Technology Pvt. Ltd.,  
23/4, Swapnamandir Society,  
19/1B, Erandawana,  
Pune – 411004  
MAHARASHTRA.

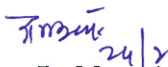

This is to convey the State Election Commission's and my own appreciation of the excellent work done by your team for developing, providing and implementing the Web based solution for bifurcation & preparation of ward-wise draft and final Photo Electoral Rolls based on the Election Commission of India (ECI) Voter List Database as subsequently revised by the Electoral Registration Officers and the Election Management and Statistical reporting modules.

Preparation of web based ward-wise voter lists for each tier of Panchayati Raj Institutions i.e. 33 Zila Parishads, 295 Panchayat Samities and 9900 Village Panchayats having 3.27 crore voters and 46 Urban Local Bodies having 63 lac voters was undoubtedly huge, complex and challenging to be completed and implemented in a tight time schedule. The delay in delimitation of Wards further made the time schedule extremely tight and all the more challenging. This is indeed highly satisfying and heartening that your team worked day and night and completed the task not only in time but also efficiently and effectively to our entire satisfaction. All your team members were technically proficient, exhibited high degree of sincerity of purpose, responsiveness and perseverance while completing this high pressure job without which perhaps it would have been difficult to hold the elections in time.

I would like to place on record appreciation of the excellent work done by the team of Ultimate Information Technology Pvt. Ltd., Pune.

With best wishes,

Yours sincerely,

  
(Ram Lubhaya)

#### CERTIFICATE

State Election Commission has implemented Election Management Program wherein website of the State Election Commission was linked with the web pages of the local bodies. Under the program, voter list related all issues are managed through the software. This Election Management Program proved to be very useful and successful tool in conduct of local body elections. The website and the program was appreciated by every strata of the society.

Ultimate Information Technology Private Limited was successful in the tender and contract was given to them from 01.08.2011 to 31.07.2014. The Election Management Program was successfully implemented by State Election Commission, Maharashtra with efficient support from Ultimate Information Technology Private Limited. We certify three year work of Ultimate Information Technology Private Limited in the website development and Election Management Program was satisfactory.

We appreciate M/s. Ultimate Information Technology Private Limited's dedication towards work and wish them good luck for future endeavours.

( Avinash Sanas )  
Deputy Commissioner
